There are two ways I can explain how AV Super Sunshine sounds. The first is how I imagine aliens think the music we listen to on earth might sound. The second is if the lead singer of Cake joined the Counting Crows, then travelled with them to space and wrote an album about it. Every single song on their record, *Bass Face* uses some form of space-like sounds and maintains a funky beat, and it's sincerely not half bad! I can't say it'll be the best album you listen to this year, but move over, Xenon – AV Super Sunshine is the band of the 21<sup>st</sup> century!

Sounds Like:

Cake (the band) + Aliens (not the band)

Recommended Tracks:

3. I Am Alien - desert rock, gives you a good feel for their sound

5. Melancholy Life - upbeat song that's easy to listen to
