This LA-based band's self-titled album is a blend of different types of genres and feels like getting hit by a train from beginning to end, in a good way though. This band will blow you out of the water with their short songs full of raw originality. It is filled with eccentric rock'n'roll guitar riffs accompanied by Arrow de Wilde and Henri Cash's sweet ass vocals. I promise that this album will take you on a trip. I felt as if I was in an 80's movie montage and it's definitely something I would play if I were to go on a spontaneous roadtrip in my cherry red convertible. The whole album was great and I would recommend "Chicken Woman" (I resonate with this song so much because I feel that I'm a chicken woman), "Full of Pride", and "Pussy Tower". I feel that these songs do a great job of encompassing the band's vibe as a whole and are catchy tunes you can find yourself singing out of the blue. Overall, a great listen!
