You must listen to this EP with headphones to get the full experience! This EP is a mix of hip hop, jazz and synth. It's really pretty and soft instrumental music. This would mix well with those 24/7 lofi hip hop radio - beats to chill/study/relax streams. When I listened to this I was able to focus pretty well so I recommend. There isn't anything too differential or new on this, it is just some nice music! Although I found out the girl on the cover is not Elaquent so :(.
